

Appendix A is an example of making chains. It can be treated as an extension of the appendix of paper 'Illogic a feasible method of understanding theory of everything'. Those contents are posted on the facebook public page 'illogic world' one day per paragraph with a figure.

The example can be treated as a tiny network with several combined chains. The chains are separated by the key points to reduce the logic connections. Those key points are defined as:

The one who make the chain should try its best to do it, but at some point he/she will forget to do it. This is defined as the key point.

In the extended example (the Appendix A), this key point is built by posting the World model 1 everyday on the facebook public page 'illogic world', once I forget to post there, the key point is found and a new chain started.

In the Appendix A, the text are from the public posts with some extra text in '()'. Those '()' denotes the points which are out of plan. The following information is given to identify which is the key point.

Those words in '()' are:

(A missing day here): Forget to post on that day.

(A delay post.): Forget to post on the day.

(An extra 'e in the text. A mistake word shout?r): Mistaken words in the post.

(Day 140 and Day 141 have the same picture in the posts.): Same pictures in the post.

(Auto post) (Auto post ends): Use facebook's autopost for a time range.

(A missing figure in the post.): Figure is not included in the post.

(An early post.): Post two paragraphs on one day.

In those words, 'A missing day here', 'A delay post' and 'An early post' can be treated as the key points. The others are mistakes but not I forget. Mistakes do not reduce the logic connections to myself. Auto post is bad for making key points because I can not forget to post because of that. Thus it will kill the possibility of making key points and reduce the number of chains. For the same reason, you cannot write the chain down because in principle any checkable material will kill the possibility of making chains in the same way. For example, I wrote this document/made posts. Thus those chains and key points are ruined for me because of this.

This is not the only possible way to make multiple chains. But any other way does not reduce the difficulty to get into semi-logic.

The reader should do what I show here to make key points. As the key point is the broken point of logic connections, it is the way to make more chains. Until a complicated network is built up, the reader will gradually realize the importance of the paper 'Illogic: a feasible method of understanding theory of everything'. Reader will try to stop using the concept of right and wrong, subjective and objective, and give up the feeling of reasonable.

Before that, the reader should also evaluate the complexity they need. In Appendix A, I started the post with three independent paths: story, figure and worlds in the figure. I found it is not necessary to use three and I remove the worlds in the figure. Such complexity is enough for me to show how to make chains with key points in one year.

As this method is not the only option to make multiple chains, the paper does not mention it. The reader can use it or develop their methods according to the paper 'Illogic a feasible method of understanding theory of everything'.

Appendix A

World model 1, day 1.

I like flying. I want to stand on a sword and fly.

World model 1, day 2.

I want a special shape of the world. It looks like a gourd. Creatures live on top of the inner shell and the gravity is perpendicular to the inner shell.

World model 1, day 3.

There is a hole around the waist of gourd. It floats inside the gourd and sends out light for a half day. That is the sun. When the sun stops sending light, the night starts.

World model 1, day 4.

There is a continent at the bottom of gourd. Besides this continent, the sea and islands occupy the rest.

World model 1, day 5.

In this world, I want three types of things. One is pure energy -- the propagating light. Another is the material -- any gas, liquid and solid. The last is the magic light or standing light. That is light ribbons floating everywhere. There are five types of the magic light -- the five elements.

World model 1, day 6.

People with magic talent can absorb the magic light into their body. They can use the magic light in body as their power. They are known as cultivators or magicians.

World model 1, day 7. (Figure 1)

It's Sunday today. I should rest on the first 7th day. Instead of building this world model, I put the puzzle in my phd thesis here. There is a key in the puzzle. In addition, this world model also gives an instruction to understand it.

World model 1, day 7. (Figure 2)

The puzzle should be printed on both sides of A4 paper and read. (Figure 1 and 2, Figure 2 flip side like a book)

World model 1, day 7. (Figure 3)

World model 1, day 8.

The story starts on the eighth day. I'd like to start with a sly old man in the story. They call him Foreseen. He is a cultivator with a big wine gourd on his back. He like drinking a lot and does not pay for it. His poor student usually has to pay.

World model 1, day 9.

The name of his poor student is Silence Chen. He worked hard everyday to pay for his teacher's debt. The teacher Foreseen's task is to steal things from other cultivators' pocket and use them to change for wine.

World model 1, day 10.

Silence Chen works for Family Bai, which is one of the biggest family of cultivators in the country. He does not want to, but Foreseen sneaked into the secret wine cellar of Family Bai and drunk a lot there -- the most expensive ones. Family Bai caught the teacher and the student at that time.

World model 1, day 11.

All the seniors in Family Bai came to them. Patriarch of Family Bai pointed at Foreseen and shouted: 'Who is this stupid old man?! I will kill you both!' Silence almost could not breath as the magic pressure from patriarch is so strong. 'He .. he is Foreseen.'

World model 1, day 12.

'Who?' Patriarch asked again. 'Foreseen.' All the seniors changed to a weird face and talked with each other secretly. At last, patriarch turned to Silence once more and said: 'I heard you can make magic tool. Two options. Make magic tool until you pay back all the losses. Or I will kill you at once.'

World model 1, day 13.

On the next day, Silence Chen and Foreseen were put in jail. A young cultivator came to him with an ice face. The young man threw him a bag of finecopper mine. 'Call me when you have 10 finecopper knives.' The young man went away and said without turning back his face.

World model 1, day 14.

3 days later, the young man got surprised with ten finecopper knives in hands. 3 days later, another ten. He ran to the boss and patriarch came with him. 'Sorry sir.' Patriarch said, 'Please forgive my impolite, dear alchemist.' Silence went out of the jail with a pair of greedy eyes behind him.

World model 1, day 15.

Silence was guided to a large house. The young man handed in a large bag of materials carefully and mentioned there were 4 cultivators as his servants. Silence took a look at them and smile. 'Strong servants.' The house is another jail, only a bit nicer. He knew.

World model 1, day 16.

Now it is the third year. Although Silence Chen paid enough to the Family in the second year, he could not stop his teacher from stealing. The Family paid for the new stealings and Silence had to go on working here. He understood the weird faces of seniors when they hear the name of 'Foreseen', the name of bad luck and poor.

World mode 1,day 17.

Now Silence has 8 strong servants following him everyday. He knows Family Bai will not let him go. The family has a big shopping center of magic tools and half of their income relies on him. They have to find a reason to keep him. Foreseen's new debt is a good one. Family Bai knows, no one can prevent him from stealing.

World model 1, day 18.

So does Silence Chen, he sealed him, tied him up, kept watch over him and any other ways he can try. Nothing works and he can still steal. Silence gives up and changes to think about his future. To be honest, it is good to stay in Family Bai. They will support him as much as they can, because they can get a lot if silence becomes better.

World model 1, day 19.

In the family, there are thousands of cultivators. They try their best to attract the attention of seniors especially patriarch to get more magic resources. But Silence does not like it. 'It is good, wonderful, excellent. But I want freedom!' He says to himself.

World model 1, day 20.

Silence has to fight for freedom. But each of the eight servants is more powerful than Silence. He has no chance to escape. Until one day, the patriarch bring him a task. 'Dear Silence, we got a request of making a special magic tool.'

World model 1, day 21.

Silence has to make a top grade magic tool. If properly used, a small family can use it to fight for more resources. After 50 years, the small family will become a big one. Family Bai did that several hundred years ago. He agrees to make and asks to read more in the library.

World model 1, day 22.

One day, Silence meets his best friend Xiaozhen Li. He just say hi and nice weather. Xiaozhen goes away with the unfriendly eye sights from the servants and does not reply anything. Servants don't know Xiaozhen is the best killer in the juniors, but Silence knows. He has a chance to escape.

World model 1, day 23.

At night, Xiaozhen comes to him. 'The servants are settled. Let's go!' Silence smiles and picked up the drunk Foreseen. Xiaozhen sighs: 'Kind is your worst enemy.' Silence: 'He is our teacher anyway. And if we are in bad luck, Foreseen should not survive alone.'

World model 1, day 24.

They are almost out of family Bai until they see a handsome man in white cloak. The man smiles to them. 'Silence, you find a good helper, the best Killer among the juniors in Fun sect.' Silence puts

down Foreseen and says to Xiaozhen: 'We fail. He is Xiu Ye, a senior from sect Ghost-Evolution, the sect behind Family Bai.'

World model 1, day 25.

The sword of Xiaozhen flies towards Xiu at once, even before Silence ends his word. Xiu still smiles and throws a burning talisman. The sword hits on the talisman and Xiaozhen steps backward with a red face. Silence hurries to Xiaozhen and holds Xiaozhen with the magic power. He feels like a running monster hits on him and blood comes to his mouth. Xiu stops attacking.

World model 1, day 26.

They fail to escape. To their surprise, Xiu does not kill Xiaozhen. 'I'm not the slave of Family Bai.' Xiu says. He takes Silence and Foreseen back to the house and puts his wallet in front of Foreseen. 'That's all I have.' Xiu says, 'What is my destiny?' Foreseen whispers in drunk. Xiu catches his word and feel depressed: 'Thank you.'

World model 1, day 27.

Silence knows there are knowledgeable people working as consultants. He himself can answer questions of making magic tool, as a specialist. If he can answer more than one type of questions, he will be a generalist. Level above generalist is the godlist, anyone can just go to the person and ask. Godlist will answer anything.

World model 1, day 28.

Foreseen is the only godlist in history with clear record, but Silence never sees anyone pay for his answer before. He knows why and Xiaozhen knows as well. Actually everyone knows, but they two know much clearer than others as they are Foreseen's students. That is, anyone gets the answer from Foreseen will be in bad luck, bad luck beyond one's imagination.

World model 1, day 29.

Another four guards come to Silence on the next day, together with Xiu Ye. Silence knows he has no chance to escape even with Xiaozhen. 'If you want freedom, become stronger until no one can say no to you.' Xiu says to Silence. Silence smiles to him. 'Thank you. If you need magic tool, I'd like to help.'

World model 1, day 30.

At night, Silence finds a magic bag under his bed. He recognizes that's the bag from Xiaozhen. There is a green bowl with magic fire logo floating on it. He picks up the bowl and a special freezing cold comes from his finger, like a ice lance penetrates his spirit. He drops the bowl on the ground and sees a note below the bowl.

World model 1, day 31.

Silence picks up the bowl out again. 'The Ghostfire'. As an alchemist, he knows what does a name of a magic tool mean. Magic tool has several levels, low, middle, high and top grade. For a big Family, there is usually one top grade magic tool as their strongest weapons. Because it takes too many cherish materials to make one and the success rate is too low.

World model 1, day 32.

There is a special kind of top grade tool. It is much stronger and it has a name which starts with 'The'. If a Family loses such a magic tool, they will try their best to get it back before the message spreads out. Otherwise the Family will be in danger, as the family have lots of money, magic plants and other magic mines, but no powerful weapon to protect.

World model 1, day 33.

Silence holds the bowl. He knows if Xiaozhen takes the bowl back to his sect and sells it there. Xiaozhen can get enough herb pills to break his current bottleneck and become a senior. 'Such a precious tool, you left me.' Silence whispers, 'I will remember.'

World model 1, day 34.

Silence has to think about how to make use of this precious opportunity and how to become stronger. His major is from Foreseen, the slowest major in the record. Foreseen himself spends most of his life on this major, and he is still a junior. It's not practical to become stronger in a short period of time from this major.

World model 1, day 35.

Silence has to think about how to use the magic power better. There are two common ways, the spell and the magic tool. Due to the limitation of his major, Silence can only use five spells corresponding to the five elements. He has learned 'Watercloud' and 'firesnake'. Silence can fly with a cloud under his foot with the first one, and second one for attack.

World model 1, day 36.

Silence needs the spells to defend and heal. And he goes to the library of Family Bai. He has a good reason for that as he needs to prepare for the top grade magic tool. Silence finds a note inside the magic book of spells. 'Silence, delay a week when you make the magic tool!' The words disappear after Silence reads it.

World model 1, day 37.

Silence comes back with the spells and thinks about the strange words on the note. He affirms the note is not from Xiaozhen but can't find a clue for that. Silence stops thinking about it and looks into the new spells, 'woodgrowth' for healing and 'earthjail' for defense. The next day, patriarch comes with two monks.

World model 1, day 38.

One monks is middle-aged and the other is quite old with a nice smiling. The middle-aged monk says to Silence: 'Mr Chen, I take the blueprint of the magic tool.' Silence unfolds the paper. There is a mirror on the paper with plenty of tearing ghosts around it. Silence takes a glance at patriarch. The patriarch keeps silence but only show his respect to the old monWorld model 1, day 39. This magic tool is against ghosts. Now Silence understands the strange words he saw in the library. Family Bai is famous for breeding ghost and they have a good relation with the sect of Ghost-Evolution. If Silence makes the magic tool, the powerful tool is harmful to Family Bai. But if he fails, the monks may think he is on purpose and throw their anger on the patriarch.

World model 1, day 39.

This magic tool is against ghosts. Now Silence understands the strange words he saw in the library. Family Bai is famous for breeding ghost and they have a good relation with the sect of Ghost-Evolution. If Silence makes the magic tool, the powerful tool is harmful to Family Bai. But if he fails, the monks may think he is on purpose and throw their anger on the patriarch.

World model 1, day 40.

No matter what Silence does, it breaks the relationship between him and the patriarch. But Silence cannot refuse and he does not have the power to say no. He turns around his eyeball. 'It is such a rare magic tool! I don't have much confidence in it.' Silence says, 'I need sawdust from a special kind of tree for help.'

World model 1, day 41

The patriarch starts to smile and asks, 'Does it hard to get? I can ask the whole family to seek for it.' Silence knows he will never find it and the monks will be angry with Silence. He rolls his eye at the patriarch and says: 'No, I know where the tree is and it is not far from here.' The patriarch's smile disappears.

World model 1, day 42.

Silence: 'I can go with you to find it.' Patriarch: 'It is dangerous for you as 7 servants have been killed recently.' Silence: 'Hmmm, my teacher knows as well. You can go with him.' At last, the middle-aged monk goes with Foreseen and Silence says in his mind: 'Good luck and enjoy your suck journey, poor man.'

World model 1, day 43.

In the forest, there are lots of monsters at the level of junior cultivators. Silence can feel this monk is at level of patriarch, the senior level. As long as the monk is careful, there is no danger for him. But he goes with Foreseen. Silence knows 'careful situation' never comes true.

World model 1, day 44.

The middle-aged monk comes back with a broken cloak. His face is full of soot and dust. The monk throws the sawdust to Silence and says nothing. Silence smiles. 'Great! It will improve the success rate a lot!' Silence says to the servants: 'Seal the house, do not let anyone go in!'

World model 1, day 45.

'Delay a week.' Silence whispers the words from the note in the library. 'Who sent this message?' Silence thinks and he flips over the book where he finds the note. It is an introduction book about the sects in the country. The note is in the page of Fun sect where Xiaozhen comes. 'A note from Xiaozhen's friend?' Silence whispers.

World model 1, day 46.

Besides the strange message, Silence also finds there are more and more seniors coming to Family Bai recently. When Xiaozhen came to him, Xiaozhen mentioned there were several seniors around the house. One of them is Xiu Ye, from Family Bai's side. Where are the rest seniors from? The rest seniors are from Family Bai or not?

World model 1, day 47.

Silence reminds when Xiaozhen and him fight with Xiu Ye, they two even cannot stand for a minute. Family Bai does not need another senior if they only aim to keep Silence. But if Family Bai sends more than one senior to keep silence, it means Xiu Ye is not enough. 'That's even worse.' Silence says to himself.

World model 1, day 48.

The rest of seniors are not friendly as it is not a good sign many seniors come secretly. Silence has a forced smile on his face and looks at the precious material in hand. 'It looks like something will happen after I make or fail to make the magic tool.'

World model 1, day 49.

Silence decides to delay a week. If something bad happens, they need Silence to make the magic tool at least. That is his only bargaining chip. Silence circles his necklace on the finger. The rough necklace rubs his skin. 'Hope I will have a good luck this time.'

World model 1, day 50.

The necklace is the gift Silence receives from Foreseen. When he starts to have Foreseen as his teacher, Foreseen takes down the tip of his wine guard with a long vine on top. Foreseen weaves a necklace with the long vine and gives it to Silence. Silence always wears it as Foreseen always takes his big wine guard.

World model 1, day 51.

A cute shining bear comes out of the necklace and it flies on the shoulder of Silence. The bear pastes its hairy face to Silence's head. Silence smiles and plays with the bear for a while. 'You are the only thing makes me happy.'

World model 1, day 52.

Silence found this cute bear sleeping in a treehole, like a small baby. It is such a unique animal and its body is pure magic. As far as Silence knows, only the magic baby of a cultivator is pure magic. The bear is at the level of junior but with such a strong body.

World model 1, day 53.

Silence is afraid the bear may attract greedy people. He asks the bear to hide somewhere and the bear chooses his necklace. He is surprised as the bear is as big as a baby and the size of necklace is close to his nail. He cannot find out how the bear goes into it. 'Amazing necklace from the wine guard of Foreseen.' Silence says.

World model 1, day 54.

Silence tries to find out how the bear goes into the necklace and he fails again. He cannot even feel there is a magic bear in the necklace. An idea comes into his mind. 'If I cannot feel, the other people may not as well.' Silence takes out 'the Ghostfire', 'That is the safest place.'

World model 1, day 55.

Silence keeps on thinking for the whole night and makes a plan. With full of confidence, he opens the seal of the house and tells his servants: 'Now I'm confident enough. This is the assistant material I need.' Silence sends a note to the servant, 'give me in three days and bring Foreseen here!'

World mode 1, day 56.

The servants hand in the material list to the patriarch and monks. 'It is a bit weird.' The middle-aged monk says, 'it looks like the material for a defending magic tool.' Patriarch says: 'Indeed it is a bit strange, but each alchemist has his own style. I know Silence usually practices once with other tool before he makes the important tool.'

World model 1, day 57.

Silence gets what he wants on the third day. He seals the house completely and tells the servants it will take another one week. 'Do not disturb me no matter what happens, or the magic tool fails.' The patriarch and the middle-aged monk guard around his house day and night. Silence is satisfied and he starts to make a magic tool.

World mode 1, day 58.

Silence makes a high grade magic cloak on the fourth day, with the material he blackmails from the monks. The cloak can protect him from fire and it can also be a strong armor. Silence wears it at once under his clothes.

World mode 1, day 59.

At the last day of he promises, Silence thinks it is enough. He takes out the 'Ghostfire' in hand and squeezes all his magic power into the tool. The dark green bowl is flickering in his hand with a gloomy taste. Magic light flows into the bowl and the magic light comes to liquid at bottom of the bowl. The ghost on the surface of the bowl starts to move.

World model 1, day 60.

Silence tries his best but the liquid only fills a very small part of the bowl. The ghost on the bottom stretches their body and floats on the surface of the bowl. But they can only move on the surface with liquid. The ghosts are angry and shout to Silence. The scary scream blocks Silence's spirit and he falls on the ground.

World model 1, day 61.

Silence struggles up and asks the bear take it into the necklace. At the same time, in a small room close to his house. More than thirty seniors sit together. The head of them suddenly stands up and looks towards Silence's house. 'The flavor of a strong ghost, dark and evil.' The head licks his lips and says, 'The tool is done. It is the time!'

World model 1, day 62.

The head turns to a man in black and says: 'Xiu Ye is your target. Keep him until we are done!' The man smiles: 'As you wish. Remember the rest of payment to Fun sect. If you fail to pay, your end will be worse than him!' The man goes away with another twelve seniors.

World model 1, day 63.

The head turns to another team and says: 'Brothers, I have paid Fun sect most of our wealth in the family. If we fail today, the name of Family Cheng will disappear and we will die. Or, we will get back what Family Bai has stolen from us, 'The Ghostfire', together with their 'Skyhiding' and the alchemist Silence!'

World model 1, day 64.

The rest of seniors split into two groups, one group goes into the center of Family Bai and starts to fight. The other team of five seniors together with the head breaks into the house of Silence and the patriarch of Family Bai meets them. 'Long time to see, Cheng Cheng.' Patriarch of Family Bai says.

World model 1, day 65.

The head sneers and says: 'Patriarch Bai, you can be so leisure and calm. That is far beyond my expectation!' Patriarch Bai says: 'Not a surprise. You say we steal your magic tool, 'the ghost fire', but we do not.' The head says: Today we will see who is right, with my fist.'

World model 1, day 66.

The head points out the window. The other team is attacking and the center of Family Bai comes to a big mess. The Patriarch can smell the taste of powerful spell and magic fire starts to burn everywhere. 'You will pay for it!'

World model 1, day 67.

Family Bai is in danger. Each of the senior is attacking by two attackers at the same level. There are also several senior attackers flies around and grab the fortune in Family Bai, slaughtering the juniors. The market of Family Bai comes into a hell. Fire, blood, screaming and the people running around play a symphony of tragedy.

World model 1, day 68.

Patriarch Bai starts to fight with the enemies and they easily break the house of Silence. But they both do not attack sealed room, as the two monks sit there and they are chanting. 'Don't bother us. We are only waiting the magic tool making by Silence.' Middle-aged monk says. The head of attacker bows to the old monk and join the fight.

World model 1, day 69.

The head together with other five seniors surrounds the Patriarch Bai. Powerful spells and magic tools are flying towards him. Patriarch Bai takes out a shining talisman and pastes it on his head. Strong golden light forms a round shield and it keeps all the attacks away from him.

World model 1, day 70.

Cheng Cheng is angry and shouts to partners. 'Hurry up. We are six people! Kill him at once and we can go to grab more in his family!' The other five seniors work harder and the golden shield starts to vibrate. Cheng Cheng stares at the shield and keeps on attacking.

World model 1, day 71.

Patriarch Bai takes out an ancient alms bowl and starts to activate it. The dark yellow bowl receives his magic power and flies in front of him. It starts to rotate slowly and a strong powerful pressure comes up. 'Shit!' Cheng Cheng says, 'That is 'Skyhiding', their final weapon!'

World model 1, day 72.

Cheng Cheng stares at Patriarch Bai in the shield. He starts to be nervous. His attack becomes weaker as he knows Patriarch Bai will start the 'Skyhiding'. Then Patriarch has to open the shield and it is a waste of power to attack.

World model 1, day 73.

Cheng Cheng has the confidence as there are six seniors on his side. But he takes a glance at the old monk sitting in front of Silence's room. That is the point Cheng Cheng really worries about. 'Why Patriarch Bai has such a powerful talisman?'

World model 1, days 74.

This talisman has protected the patriarch for several minutes under the attack of six seniors. It has a taste of Buddhism's power. But Family Bai is good at feeding ghosts and asks the ghost to fight. Where does he get this powerful talisman from Buddhism? They are enemies!

World model 1, days 75.

Cheng Cheng feels worse and worse. He plans very well and collects enough information. The monks are only for the tool. They don't want to take part in any of this problem. In addition, Cheng Cheng has asked the opinion of the old monk and he got clearly answer. He does not think the monk cheats him as the old monk has a very good reputation among the past two hundred years.

World model 1, day 76.

Cheng Cheng is confusing and a bowl of Patriarch Bai rotates faster. Patriarch Bai points to the bowl and casts a spell. The bowl shines with all its strength. All the attack spells and magic tools are interrupted. Patriarch Bai takes down the talisman and points to the bowl once again.

World model 1, day 77.

But the old monk opens his eyes. 'Hmmm?' He looks confused and then smiles, 'an interesting little boy.' Patriarch Bai and Cheng Cheng stop their spells. They look towards the old monk and the old monk does not say anything, closing his eyes again. These people fly away to perform a life-and-death battle.

World model 1, day 78.

Silence is still in his room. He can feel the earth is slight shaking and he knows something not good happens. The seal is designed for an alchemist to prevent them from being disturbed. The fight among junior level is not enough to bring in any noise. Silence knows his chance is coming.

World model 1, day 79.

Silence takes out a finecopper chopper and starts to dig on the ground. The house is built on hard earth with the magic circle. He cannot use the magic spell to break the floor as the circle reacts to any magic power. He has to use the original way of digging, with the sturdy and sharp tool he makes.

World model 1, day 80.

Silence takes Foreseen with him and digs for quite some time. It is several tens of meters away from his house. He thinks it is beyond the scope of the circle but there is a big piece of granite in front. The stone is too hard beyond his expectation. Silence cannot use the firesnake as it will burn him as well in this narrow tunnel under the ground, and other spells are too weak.

World model 1, day 81.

An idea comes to Silence's mind. He knocks at his necklace and the white bear comes out. 'Can you hit these stones with your magic?' The bear flies in front and has a deep breath. Silence hurries away with Foreseen and the bear opens its small month. It looks like the bear shouts to the stone but there is no sound.

World model 1, day 82.

A kind of special invisible power flows towards the stone and it slams into the stone. Sharp noise bursts out like many sharp knives scratch with each other. The strong noise comes to Silence's ears and he covers his ears with shouting. The noise only lasts for a small while and it disappears. The big granite breaks into pieces with many traces of cutting on it.

World model 1, Day 83.

'Roaring wind.' Silence takes a long breath, 'Such a strong spell as usual.' The white cute bear jumps onto his shoulder and pastes its face on Silence. 'A strong monster with a pure energy body and simple mind. I hope you do not have the habit of sleepwalking, otherwise I may get killed by you.' Silence strokes the bear and says.

World model 1, day 84.

Silence's leisure lasts for only several seconds. The stone breaks down and it cannot support the earth above. The earth starts to collapse and Silence hurry to send the bear back into his necklace. The collapse stops and Silence come out of the tunnel. The situation amazed him and he is shocked standing there.

World model 1, day 85.

Silence looks around. Xiu Ye and the female senior are kissing, with a teenager girl beside them. There are 13 people in black around them. Everyone give a strange look to Silence as he is full of dust on his face, together with a drunk old man on his back. 'Hi, Silence.' Xiu Ye says to him, 'Nice to meet you again.' Silence has a forced smile on his face and says: 'Sorry, I break your floor.'

World model 1, day 86.

Silence comes out of the ground and put Foreseen down. He knows it is not possible to go away. Xiu Ye turns to him and says: 'I have a last request. Could you do me a favour?' Silence feels a bit strange but he still says: 'As long as I can.'

World model 1, day 87.

Xiu Ye leans over and says to the little girl beside him: 'Shepshaking, follow Silence before you can stand on your own.' Before she answers, Xiu Ye points on the girls head and a dark light shining around her. Xiu Ye looks quite tired after this point and he passes the hand of the little girl to Silence. 'Take care of her. You are the only person I can trust.'

World model 1, day 88.

The little girl seems sleepy and not clear enough. She does not answer but murmurs some words. There are dark runes floating around her head. These runes shine a dark light and go into her head. The little girl seems quite a pain but she does not make any sound. With more and darker runes go in her head, she can hardly stand and Silence picks her up.

World model 1, day 89.

Xiu Ye hugs the lady beside him and looks into her eyes: 'I escaped once before at your wedding. And we were away from each other for so many years. But there is no room for regret. Today, I will not escape anymore, Wan.' The lady says: 'You will not feel lonely.'

World model 1, day 90.

The head of people in the crowd stands out and says: 'Xiu, I know you are famous, but we have 13 seniors. It is not a smart decision to join in. You are not a member of Family Bai. As long as you promise to go away, we will release you!'

World model 1, day 91.

Xiu Ye ignores his word completely and kisses the lady. The head is unhappy and does not say anything. He asks his people to take Wan at once. The lady takes out her sword and wants to fight. Xiu Ye stops her. 'It is my turn to do this, my love.'

World mode 1, day 92.

A dark spear comes out Xiu Ye shadow and flies towards the enemies, the enemies avoid the spear. But they step back and looks at Xiu. The shadow of Xiu Ye comes to life and it stands out gradually. It looks like dough with increasing size and it comes to a human shape. The dark shaped human takes off his shadow clothes and opens his eyes. He smiles: 'Hello, everyone.'

World model 1, days 93.

The head changes to a serious face and says: 'Shadower? You are a shadower? But you are famous for your talisman!' Xiu Ye does not reply a word. His eyes come to golden and the light around him blinks. The light around him starts to flow like many creeks. These creeks pool into two rivers and they flow into Xiu Ye's golden eyes.

World model 1, day 94.

With all the golden light flowing into the eyes, Xiu Ye's body becomes shining and light penetrates his body. The light goes out and runs back into his eyes. It forms a big light circle around him. Wan Bai, Stepshaking and Silence are in the circle. Meanwhile, the enemies are standing in the absolute dark. 'Skysshadow! That's Shyshadow! Xiu, are you crazy? You want to die?' The head shouts.

World model 1, day 95.

Xiu does not reply. He says to Silence: 'Stepshaking is unclear now, please tell her what you see today, together with this sentence: 'Remember, if you want to revive the name of shadower, you must find a person who is not afraid of the light!'' Silence listens very carefully. He notices Xiu's body is trembling with huge pain. He says seriously: 'I promise.'

(A missing day here)

World model 1, day 96.

With this word, Xiu Ye relieves. He says to Wan: 'Live a good life, my love.' Wan just smiles but does not reply. One of their enemies cannot endure the darkness and start to run. The light around Xiu comes to life and stings the person. The senior protect with all his power with screaming but he is submerged by the light flow and dies.

World model 1, day 97.

The head shouts: 'Don't move! His light power is hunting for any mobile creature with magic in the darkness!' The rest of the people do not dare to move. They don't think they can survive if they get a similar attack. And they also don't think they can run faster than the light.

World model 1, day 98.

Silence also understands the situation. 'Such an amazing spell! All these seniors are trapped here and they cannot move. The light can kill them even they just go a step.' But he also notices Xiu Ye, the light is flowing through his body. 'How painful he is!' Silence gets shocked. He knows Xiu Ye cannot last for long and he uses his firesnake to attack.

World model 1, day 99.

To Silence's surprise, his spell disappears in the light and the power goes into the light flow. Xiu Ye takes a deep breath and says: 'Much painful than I thought.' He says to the head of enemies: 'Clever people, you know a lot about shadower. What about next?' The head shouts to his team members: 'Take care, that is the second spell!'

World model 1, day 100.

Xiu Ye takes a deep breath and holds on. All the light flow goes into his body without any leakage. His dark body becomes transparent and his face gets paler. Silence feels a bit dangerous and is ready for his strongest defense spell. He also hides the little girl behind him.

World model 1, day 101.

After Silence finishes, Xiu Ye bursts out like the sun. All the light power breaks his body and flows towards the enemies. Except for the head, these 11 seniors take out all their strong power to defend. But the magic tool and their spells are melting in the light like the snow melts under a strong sun. The head of them does not defend but run away to escape.

World model 1, day 102.

After the shining, all of them are killed except the head, the head get series injured and half of his body disappears in the strong attack. He has a difficult breathing with scared eyes. On the other side, Xiu Ye loses all the light power around him and his body keeps trembling. The darkness becomes smaller and smaller. At last, all the darkness recovers to the size of Xiu Ye's shadow.

World model 1, day 103.

The head bursts into a laugh: 'I survive! I survive! I'm the first person who is alive after the attack of shadower!' Xiu Ye smiles difficultly: 'You don't know that much about this spell, its name is 'triple spells of shadower'!' The laugh of the head stops suddenly. 'Triple?'

World model 1, day 104.

Xiu Ye points at his shadow and his shadow breaks into many mysterious runes. These runes flow towards the head like the snowflake flying. Before the head takes any action, the runes cut him into many pieces and disappear. The head stares at the air with his dark eyes. He turns into a pile of minced meat at last.

(A delay post, day 104.)

World model 1, day 105.

Silence looks at the ground. XiuYe's shadow disappears and his face is extremely pale. Xiu Ye cannot stand anymore and fall down. Silence catches his arm. To his supervise, Silence feels like he catches a beam of noodles rather a human arm. Xiu Ye still falls down on the ground with his arm broken in Silence's hand.

World model 1, day 106.

Silence realizes he underestimates the harmful of this strong light. Xiu Ye is a shadower who lives in the darkness. The sunlight can burn his skin. But right now he kept such strong light which could kill seniors easily in his body. The light has injured his muscles bones and vessels too much.

World model 1, day 107.

'Please...' Xiu Ye murmurs in a weak voice. Silence hurries to put his ear close to the mouse of Xiu Ye. 'Please help Stepshaking, to be a shadower!' Silence replies seriously: 'I promise!' Xiu Ye smiles and dies. His face and body starts to melt and at last only his black cloak is on the ground.

World model 1, day 108.

Wan Bai comes back without her sword. She does not say anything but just keep silence aside. Until Silence replies, she smiles. She takes up the cloak and her magic bag. 'Silence, thank you so much. You are the last wish of us.' Silence realizes what she wants to do and does not take the bag.

World model 1, day 109.

But it is too late, Wan Bai freezes to a statue. Her body changes to stone with the cloak and magic bag in hand. Silence knows she wants to help the last thing before she dies after Xiu Ye. He takes the magic bag and cloak. 'I will do what I promise.'

World model 1, day 110.

'Stupid couples!' Foreseen wakes up with a little bit drunk. Silence is angry. 'Shut up! You do nothing but only drinking. Don't you feel ashamed!? If you can help, do it. Or shut up!' Foreseen rolls his eyeball at Silence. 'Such a tiny thing, it does not worth I do.'

World model 1, day 111.

'Xiu Ye gave me a lot of wine and now they are in your stomach. Xiu Ye protects us and he dies! Do something or spit his wine out!' Silence says, 'Or I will not give you any wine!' Foreseen takes a glance at Silence's angry face and he is a bit embarrassed. 'Don't be so strict. OK, OK, do something.'

World model 1, day 112.

'Hurry up! Xiu Ye's body disappears already!' Silence pushes Foreseen. 'Don't worry. Don't worry. Let me see, hmmm.' Foreseen grasps the necklace of Silence and takes it in hand. He thinks for a while and waves the necklace in the air. He gives the necklace back to Silence. Silence stares at Foreseen and says, 'That's it?'

World model 1, day 113.

Foreseen says, 'That's it.' Silence is crazy. 'What the hell you do? Save them, save Xiu and Wan!' 'I did.' Foreseen says and knocks at the necklace. There is a dark cloud coming out of it and it starts to gather. The shapes are like two persons but they are very blurred. Silence cannot distinguish who they are.

World model 1, day 114.

'They are Xiu Ye and Wan Bai?' Silence asks. Foreseen rolls his eyeballs at him: 'Or you think they are you and me?' 'But why they are so blur and unclear.' 'They are the souls. You waste too much time to complain. If you do it immediately after they die, they can be much better.' Foreseen says.

World model 1, day 114.

'They are Xiu Ye and Wan Bai?' Silence asks. Foreseen rolls his eyeballs at him: 'Or you think they are you and me?' 'But why they are so blur and unclear.' 'They are the souls. You waste too much time to complain. If you do it immediately after they die, they can be much better.' Foreseen says.

World model 1, day 115.

Silence does not know what he should say. He has been used to Foreseen's style. 'Could these souls recover?' 'Of course, it just takes a bit time.' Foreseen says, 'But their souls have to stay here forever and they cannot go to heaven.'

World model 1, day 116.

'How long time does it take?' Foreseen asks. 'A little bit time.' Foreseen says. 'How long?!' Silence insists. 'Maybe a million years.' Foreseen thinks for a while and Silence is almost crazy. 'Or maybe two million years.'

World model 1, day 117.

'OK.' Silence stares at Foreseen, 'I will not give you any drink before they recover.' 'I have a quick way!' Foreseen says immediately. 'There is a tool. It can help the soul when they get injured.' 'Where is the tool? Don't tell me the tool is placed a million kilometers from here.'

World model 1, day 118.

'No, it is quite close. Actually it belongs to Family Bai.' Foreseen says and Silence is quite skeptical about it. Foreseen explains, 'You know. Family Bai is famous for the ghost related things. When they feed the ghost, they have to find some ways to cures them when the ghost gets injured.'

World model 1, day 119.

Silence trusts his word and asks. 'So where is the tool?' 'It is in the small secret room beside the wine cellar...' 'Shut up!' Silence shouts at Foreseen. He does not want to remind himself anything about the painful memory.

World model 1, day 120.

The cellar is a secret place of Family Bai which is protected by tens of guards. In the usual time, Silence does not think he can go in. But Family Bai is in a big mass at the moment, it is the only chance for him to find the tool out.

World model 1, day 121.

It's a special day today. This is one of the key days in this world model. Please see also day 7 and day 366 in the future. 'He rests on the seventh day from all his work which he had made.'

World model 1, day 122.

Although it is quite dangerous for Silence, he picks up the little girl and grabs Foreseen. After a short while, they are in front of the cellar. To Silence's surprise, there is no attacker and guard at all. There is only a courtyard in dark with lots of sliding doors on the ground. 'Which is the right entrance?' Silence asks.

World model 1, day 123.

Foreseen opens a sliding door and goes into the cellar like being at home. Silence goes in after him. There are a lot of big barrels insides the cellar and all of them are empty. Now Silence realizes why there is not a person here. It is not necessary.

World model 1, day 124.

All the precious wines were drunk by Foreseen and that was the reason why they got caught by Family Bar until now. There is no precious thing here so that no guard is needed and the attacker is not interested as well.

World model 1, day 125.

Silence tries his best to shift his attention from these bad memories and Foreseen stops without a word. 'Where is the tool?' Silence asks with all his patience. 'Everywhere?' Foreseen point at surroundings and says. 'What?' 'Everywhere.'

World model 1, day 126.

Silence looks at the barrels and recognizes what Foreseen means. The barrels are made of a special kind of wood. It is usually used to keep the soul of the monster. These wines may contain many souls and this kind of wood is used to keep the wine fresh.

World mode 1, day 127.

Silence stares at these big barrels which are even higher than him. He knows he is tricked by Foreseen once more. How can he bring such a big barrel when escaping from Family Bai? It is too big for the magic bag and he can only bring it by hand. He will be caught immediately.

World model 1, day 128.

Silence decides to try first. He takes down his necklace and put it into the big barrel. Silence knocks at his necklace and the soul of them came out. The souls are still quite blurred and transparent, but the face becomes a bit better, at least Silence can identify which is the man.

World model 1, day 129.

'How long time they will recover?' Silence asks Foreseen. 'Don't be surprised! That is a huge improvement!' Foreseen says. 'So how long?' Silence insists with an ice face. 'A hundred times shorter!'

World model 1, day 130.

Silence stares him for a while and shouts: 'What the hell? A hundred times short?r You mean ten thousand years?' 'Maybe two hundred times...' Foreseen adds. 'Don't fool me around! We will be a deck of bones at that time.' Silence says, 'Say something practical, I know you have it in mind.'e

(An extra 'e in the text. A mistake word shout?r)

World model 1, day 131.

'Or you want to give up drinking.' Silence threatens. 'OK, OK.' Foreseen says, 'Greedy and stingy Silence! I have a way.' Foreseen points at these barrels in the cellar, 'You see, there are so many of them here. If you use two of them at the same time, you speed up by twice.'

World model 1, day 132.

Silence looks around the cellar. There are at least a thousand barrels. If Silence can make use of all the barrels, he can speed up by a thousand times. That is ten years. That's OK. But, how to make use of them at the same time?

World model 1, day 133.

Silence looks at Foreseen. Foreseen does not say anything. Silence stops asking. He knows Foreseen will for sure laughs at him if he asks. Silence walks around in the cellar and checks these barrels in details.

World model 1, day 134.

The barrels are quite old and moist, infiltrated by the precious wines. A strong taste of magic power is from the barrel. Silence is inspired. Why not use these barrels to make magic tools? It is a common thing to merge a lot of magic material into one tool.

World model 1, day 135.

The first step of making magic tool is to melt the magic material into the liquid drop. Silence uses his firesnake on one of these barrels. The magic wine remaining in the barrel dries up quickly and the barrel gets burn at once.

World model 1, day 136.

Silence is a bit disappointed. He only makes a tool from the metal material but not wood. His firesnake is too strong and wood is burned out of his control. This is not his fault as other alchemists have to use a special magic fire to melt the wood.

World model 1, day 137.

Silence does not know he needs a special fire to do it. He thinks he is not smart enough because Foreseen is laughing at him. 'So stupid! An alchemist fails in the first step of making a magic tool! How ashamed you are!'

World model 1, day 138.

Silence's face turns red and gives Foreseen a hard look. 'Maybe it is too strong to burn it directly. But what happens if I burn it in a distance?' He starts his firesnake once again and changes the shape of his snake.

World model 1, day 139.

The snake circles around the barrel and the wine remaining in the barrel dry up. The dried barrel cracks into pieces and gets burn once again. 'Hahaha, an alchemist fails twice in the first step! My student is a fool!'

World model 1, day 140.

Silence's face turns to completely red and does not say anything. He bends the firesnake into a ball with the barrel inside it. This time the magic wine does not fly away but gets trapped in the ball. The barrel gets melted into a big liquid droplet on the ground.

World model 1, day 141.

But to Silence's surprised, the liquid barrel mixes with a lot of dirty dust and he can't use it anymore. 'You are not only a fool but also a spendthrift!' Foreseen goes on laughing. Silence can't endure and throws a firesnake to Foreseen. Foreseen slips and falls on the ground when laughing. The firesnake doesn't hit the target. 'Good luck as usual.' Silence says.

(Day 140 and Day 141 have the same picture in the posts.)

World model 1, day 142.

Silence is sad and he thinks he is clumsy. But if any senior alchemist saw what he did right now, he would be surprised by the talent of Silence. Alchemist is a money-burning profession. Any talented alchemist has to practice hundreds of times to learn a skill.

World model 1, day 143.

And what is more important, Silence does not learn an existing skill. He tries a new one. He can melt the barrel with his fire and achieves in only three trials. Other top alchemists will be extremely jealous of Silence's talent.

World model 1, day 144.

Silence does not know this and he only wants to be a good alchemist. He starts the third trial. Silence casts the magic which he has tried twice. The fire snake comes out of his finger and goes around him. He does not stop but keeps compressing his magic power.

World model 1, day 145.

The fire snake becomes bigger and bigger. The temperature in the cellar rises up and Silence's hair is slightly burning. He concentrates his mind so much and does not notice. Fortunately, his magic clothes start to work. A light blue shell is formed to push out all the heat from this big firesnake.

World model 1, day 146.

Silence is to his limit. He stares at the snake and releases the snake. The big snake rushes to the bottom of the barrel and the bottom part gets burn immediately. Lots of white steam come out and go up.

World model 1, day 147.

The steam is so strong and it lifts up the rest of the barrel. At that moment, the heat melts the upper half of barrel and the liquid drop floats in the air due to the stream. Silence is excited and takes out his tool to collect this liquid drop.

World model 1, day 148.

The droplet falls in his tool and condenses into a small round ball. Silence watches this ball and he is very happy. The ball is green with a very smooth surface, such as a green chocolate ball. Before he enjoys his happiness for a second, the bad voice comes again.

World model 1, day 149.

'You are such a stupid alchemist!' Foreseen says, 'It is just a normal refinement and you get it in the third time. Look at the bad ball -- a product with a huge amount of defects. You see! The color is not the same. Dark green on one side and light green on the other!'

World model 1, day 150.

Silence turns over the ball and realizes Foreseen is right. He is usually right and the things he mentions are usually not good. Silence does not say anything and starts to melt the next barrel. After an hour, there are tens of balls in his magic tool and they are much better than the first one.

World model 1, day 151.

For an experienced alchemist, it takes about a day to refine and it takes a couple of days to recover. It takes about several months for other alchemist but Silence only uses an hour. He does not realize it because he is bothering by Foreseen so much.

World model 1, day 152.

'I think you are older than me, my student.' Foreseen says, 'So slow. Just a couple of barrels. It takes you an hour to do it! Are you older than me, young man?' Silence does not say anything because he knows he can never win against Foreseen.

World model 1, day 153.

Silence can only work harder and think harder. He realizes when he uses the big firesnake. He has to use up all his power. But due to his major, he can recover the power from one breath. If he tunes his breath together with the magic casting, it can be much faster.

World model 1, day 154.

Silence thinks and tries. He can't remember how many times he tries and he gradually goes into a situation. Silence feels he is part of the world and all the magic power goes out and goes in. The

magic power forms a special field around him. The field expands when he breathes out and shrinks when he breathes in.

World model 1, day 155.

Foreseen does not say anything but just drinks from his big gourd. There is also a field around him expanding and shrinking. The rhythm of Foreseen's breath responds to Silence's style in the room. A tiny shining white light comes out of both of them with a taste of mystery.

World model 1, day 156.

Silence feels he can swallow more but he does not know why. In his eyes at the moment, there are only magic power, firesnake and the barrels. Hundreds of barrels are refined within one hour and Silence's power becomes stronger.

World model 1, day 157.

A slightly shaking of ground breaks this special atmosphere and Silence is back to life. Silence realizes there are fighting people outside. He can feel the strong spell conflicting and the temperature of cellar goes up quickly. Silence stops his magic spell and asks the bear to hide all the refined material.

World model 1, day 158.

Silence stands up and he is going to see what happens outside. But a person rushes in and stops him. Silence is surprised. He wants to defend but relaxing after he sees the face of that person. 'Xiaozhen! How do you come here!?'

World model 1, day 159.

Xiaozhen does not reply but he throws several flags around the door of cellar seriously. The flags come into the door and form a magic circle. Xiaozhen relaxes a little bit. 'I'm a killer. That is not a problem for me. But it is really not easy to cheat the people outsides.'

World model 1, day 160.

'Who are they?' Silence asks. 'There are more than ten seniors attacking another old guy. You know the old guy very well.' Xiaozhen says with a smile. 'The Patriarch?' Silence says out of expected. 'Yes.' Xiaozhen replies, 'I do not imagine he is so strong. He has a yellow alms bowl. It helps him prevent most of the attacking. Otherwise he is killed long time ago already.'

World model 1, day 161.

'That is Skyhiding, family Bai's final weapon. We cannot escape from their fighting if we go outside directly.' Silence says and watches Xiaozhen's calm face, 'I know you have a way to escape, isn't it?' Xiaozhen smiles and points to the inside wall.

World model 1, day 162.

Silence understands at once. They can't escape from the door, but they can go away from the other side. A fire snake occurs in Silence's hand but Xiaozhen catches his arm and stops the spell. 'Don't use magic! I cast a magic circle on the door to hide us. But if you use strong power, they can find us.'

World model 1, day 163.

Xiaozhen takes out two shovels and throws one of them to Silence. 'Let's dig out!' Silence takes the shovel with a comic groan of despair. 'You are real my big brother, Xiaozhen.' Silence says in mind, 'OK, dig out again!'

World model 1, day 164.

In the cellar, Silence and Xiaozhen work hard without any sound. Outside the cellar, a big rotating bowl shines strong yellow magic light and more than ten people in black cast their attack on it. Patriarch Bai is in the center of this bowl and swearing a long magic spell.

World model 1, day 165.

Besides them, the two monks are still sitting outside Silence's room. The middle-aged monk says, 'Teacher, it is quiet for a long time in the room.' The old monk smiles and stops chanting. He points to the direction of cellar. 'What do you think about Patriarch Bai?'

World model 1, day 166.

The middle-aged monk says: 'There are more than 10 seniors together with Patriarch Cheng attacking him. I think Patriarch Bai died already.' The old monk does not reply. He stands up and goes towards that direction. 'Follow me.'

(Auto post)

World model 1, day 167.

'But what about Silence?' The middle-aged monk says. 'He is not there for quite some time already.' The old monk says without turning back. The middle-aged monk gets shocked and follows up at once. They come towards the cellar and see the people are still fighting.

World model 1, day 168.

'That's impossible!' The middle-aged monk shouts, 'More than ten seniors attacks for several hours. No magic tool can afford that power! Even the magic tool with a name cannot do it!' The old monk takes a stare at the bowl. 'You don't believe because you don't know what is it.'

World model 1, day 169.

'Long long time ago, there was a strong monk who is a magic baby cultivator. His major was a pure Buddhist one.' The old monk says. 'But unfortunately, to gain more power, he went a wrong way. He started to kill people and use their soul to enhance his magic treasure.'

World model 1, day 170.

'That was where this bowl came from. The skyhiding!' The old monk says. 'A magic treasure?' The middle-aged murmurs, 'but only cultivators above the magic ball level can use it! Patriarch Bai can't do it!'

World model 1, day 171.

'If you want to know why, then you need to know the history.' The old monk says. 'The difference between magic too and magic treasure is that the magic tool is something but the magic treasure is something alive. There are two ways to use a magic treasure.'

World model 1, day 172.

'One way is the cultivator has to trap the soul of magic treasure in his body with dense magic power, at least solid level. So you need at least magic ball level to use it.' The old monk continues, 'but there is another way to use it.'

World model 1, day 173.

'Another way?' The middle aged monk says, 'But in the text book it says this is the only way of using magic treasure.' 'That is the normal situation. But there is some exception.' The old monk says, 'For example, kill the magic treasure.'

World model 1, day 174.

'The first owner of this bowl did a famous action. You know that as well.' The old monk looks at the other monk. 'I know?' The middle-aged monk opens his mouth and tries to remind when he knows something like that.

World model 1, day 175.

Suddenly there is something coming into his mind and his eyes become right. But then he murmurs, 'that is impossible, it is such a long time.' The old monk says: 'You catch the right one I think. The first owner used this bowl to kill a family of shadows and Sky Shadow did his revenge.'

World model 1, day 176.

'After that he fought with the Evolved Daoist, who is founder of Dao-evolution and failed. But Evolved Daoist finally knew the bad things the monk did. At that time, this bowl is already an evil magic treasure and Evolved Daoist killed it.'

World model 1, day 177.

'As the soul of this bowl contained too much resentment from the dead people, Evolved Daoist could not remove them all. He at last sealed the dead soul and gave this seal to one of his student. The student is a kind hearted monk and he tried everything he can to remove the resentment.'

World model 1, day 178.

'He did not achieve and he passed this to his student. The student did not achieve and pass this to the student of student.' The old monk says, 'After lots of generations, it still did not solve. But something severe happened to Dao-evolution and it had to move to a poor place.'

World model 1, day 179.

'It ended up with here and it broke into 4 sects.' The old monk looks at the big bowl and goes on, 'The head of Ghost-evolution took it away and his students got an important information from a person. The one can use part of it if he had the seal.'

World model 1, day 180.

'That's where Family Bai came from and that is their highest secret in the family.' 'But my teacher, how did you know that?' the middle-aged monk asked. 'I'm the student after many generations of the kind-hearted monk in Dao-evolution. Now you know as well, like my teacher told me.' (Auto post ends)

World model 1, day 181.

'Use it with a seal?' The middle-aged monk murmurs. He looks at the big bowl rotating in the sky. After a short while, he recovers and shorts: 'Teacher, where is Silence, our tool is in his hand!' The old monk shakes his head with smile.

World model 1, day 182.

'Don't worry about it. There is something more important!' The old monk says. At that moment, the rotating bowl is to its limit and the Patriarch of Family Bai spits out blood. His face becomes crazy and shouts to the enemies: 'You push me!'

World model 1, day 183.

The Patriarch takes out a pill and swallows it after saying the angry words. His face becomes extremely red. He suddenly opens his eyes and hits on the side of the bowl with his arms. The arms break into blood frog and all the blood goes into the bowl.

World model 1, day 184.

The yellow holy bowl becomes dark red. It rotates slower and slower, such as a person falls into the swamp. But no one feel easy because the magic pressure of bowl rises up quickly. Until it stops, the taste of buddle disappears completely. Instead, a taste of cruel killing occurs.

World model 1, day 185.

The Patriarch shouts with crazy laugh: 'You fool! The final weapon of Family Bai now starts!' He goes out of the bowl and the bowl falls down. It hits on the ground heavily and quietly. But when it touches the ground, everyone feel something hits on their souls.

World model 1, day 186.

That is a very special kind of feeling. It is very short but clear. Like a big hand take away one's soul and just leave body on the ground. After a second, the soul comes back to the body and people start to breathe with frightened eyesights.

World model 1, day 187.

Only the old monk does not affect by the bowl too much. He knows what will happen next and he does not look at the bowl any more. He knits his brows and looks around. 'What is he waiting for?' the old monk looks quite confused, 'He is not for this bowl?'

World model 1, day 188.

The middle-aged monk hears the strange words of his teacher but he does not ask. He thinks for a while and he knows the person his teacher points to. That is a strange person they met on their way to Family Bai.

World model 1, day 189.

The old monk seldom talked to others on the way except this person. He was a man in dark suit. 'We are monks from Buddha-Evolution. And we are going to Family Bai to make a magic tool.' The monk said, 'What's your name?'

World model 1, day 190.

'Unknown.' The man in dark suit said with an ice face. The middle-aged monk was not happy and detected the magic power of this man. He was just a junior. 'That is a really bad excuse, man.' The middle aged monk said, 'That is not polite!'

World model 1, day 191.

The old monk stopped his student and asked again seriously: 'Your name is Unknown?' The man nodded his head slightly. 'You are going to Family Bai?' Unknown nodded again. 'Hope you have a good luck!' Unknown nodded again and left.

World model 1, day 192.

'What a strange man!' The middle-aged monk said, 'He is just a junior! I never see such an impolite junior before!' The old monk shook his head and said: 'A junior? I don't think a junior can have such strong resentment around him!'

World model 1, day 193.

'You mean, he is a killer?' The middle-aged monk said. 'Not that simple.' The old monk said. 'You know there are five sects in our country. One of them is the sect of killer, Fun sect.' The middle-aged monk recognized something and said: 'You mean, it is... him!?'

World model 1, day 194.

The middle-aged monk recalls that simple face with a black suit. He still cannot believe such a Plain-Jane man is that famous Unknown! There is a sentence in Fun sect. As long as this guy exists, no one can beat Fun sect.

World model 1, day 195.

A guy used to ask in the meeting of elders. 'If all the other four sects come together to remove Fun sect, do you think it is possible?' One elder from Fun sect answered: 'As long as Unknown is there, I don't think you can achieve.'

World model 1, day 196.

And now, Unknown must be somewhere in the Family Bai. But what is he waiting for? The middle-aged monk is also confused. In his eyes, the most precious thing in the Family is this bowl. But where is unknown?

World model 1, day 197.

Actually the answer is simple and out of expected. Unknown is under the ground and trying to get Foreseen out of the earth. Silence, Xiaozhen and Foreseen are not lucky this time. When they dig on the wall, they touch the magic circle of Family Bai and get attacked.

World model 1, day 198.

At that time, Silence is digging with all his force and Xiaozhen is also trying his best while Foreseen is sleeping. They are under the ground but no one can imagine there is a strong attack magic circle in such deep earth. So the stone and earth buried them.

World model 1, day 199.

Xiaozhen and Silence are trying their best and go out of ground. But they don't have any ability to save Foreseen. If we look back to the history, Foreseen is always lucky. So this time unknown comes up and saves him.

World model 1, day 200.

'Wake up, my teacher.' Unknown says, 'This is the last thing I will do for you and you are calling me to protect a person. Who is him?' Foreseen stuns the sleepy eyes. 'Come on, that is your brother, Silence. Don't be so strict!' 'Shut up! Or I will leave.'

Unknown says angrily.

World model 1, day 201.

Unknown leaves Foreseen on the ground. A minute later, Silence comes with Xiaozhen in a hurry. 'I said that. Don't worry, he is never in bad luck!' Xiaozhen says with a smile. 'I said that as well.' Silence says with sweat on his forehead. It looks like he ran too fast.

World model 1, day 202.

They take Foreseen away quickly. Unknown comes up with a smile. 'Interesting brother. Saying you don't care but actually yes.' Unknown looks back and sighs, 'But you are really not careful person. Such big sound from the magic circle you broke.'

World model 1, day 203.

Unknown stands here like a stone. Half minute later. Two senior cultivators come and they see Unknown. They detect the power of Unknown and find him a junior. 'Young man, you are the person making the magic vibration?'

World model 1, day 204.

Unknown shakes his head. The one who asks this question frowns. 'Who are you, young man? No one teaches you how to be polite to a senior?' He releases his magic pressure towards unknown but nothing happens. 'I'm unknown.' Unknown says.

World model 1, day 205.

'Unknown?' The senior frowns further, 'Do you know any big family has such a young cultivator?' The other senior says he does not know. The senior turns his head to Unknown. 'Then you are just a junior without any background.' He goes towards Unknown with an evil smile.

World model 1, day 206.

'I know you have some good tool to protect you, otherwise you cannot be so calm under my magic pressure.' The senior says, 'But you are so stupid that you think you can survive from two seniors with that magic tool?'

World model 1, day 207.

The senior comes closer and closer. But Unknown just stands there peacefully, without saying anything. The other senior feels a bit strange and says. 'Kill him! With your strongest attack! We need to be back to help them!'

World model 1, day 208.

The senior stops playing and takes out his sword. 'Young man. Go to the hell!' He runs very quickly like the wind. Unknown just stands there without moving. He speed up and his body becomes blur as he runs too fast. Unknown still stands there such as he does not see anything.

World model 1, day 209.

The senior stings Unknown with his sword. At this moment, the pressure from Unknown rises up sharply. The senior feels like he is a small boat in a storm! His attack suspends for a short while and Unknown moves.

World model 1, day 210.

Unknown does not take out any magic tool but just uses his fix. One hit! The senior flies away with his blood paving the way! The other senior stuns and cannot believe. 'The peak level of senior. That is impossible! No one can reach that level without a background!'

World model 1, day 211.

'I'm Unknown.' Unknown says peacefully. The standing senior's face turns to be pale quickly. 'You are Unknown?' He starts to understand what Unknown means. He kneels down at once and says. 'I didn't know you are the Unknown!'

World model 1, day 212.

'You are the people in Fun sect. I don't kill you.' Unknown says, 'Tell the people coming with you, I'm here to protect Silence.' Unknown leaves. The two seniors look at each other. 'We are lucky to join the Fun sect. Otherwise we are dead already.'

World model 1, day 213.

At the moment Unknown uses his power, several kilometers away, the old monk stares at the direction where Unknown presents. 'What is he doing? He is fighting over there. The bowl is not his purpose?'

World model 1, day 214.

The middle-aged monk says, 'Teacher, it looks like Patriarch Bai is to his end. Shall we do something?' The monk old comes back to mind and smiles. 'End? No, it does not start yet.' 'But the defense of Patriarch Bai is very weak. I think in the next round he will lose his life.'

World model 1, day 215.

The old monk just smiles without answering. Suddenly, the bowl bursts into blooming. A strong beam of gold light goes out of the bowl and flows towards the earth. It hits on the ground like a golden river and the golden light flow among the ground.

World model 1, day 216.

'No!' The middle-aged monk shouts in horror but the golden light flow through his body without any effect. He looks at the old monk and he finds the old monk does not do anything but chants. 'Don't be panic.' The old monk says. 'That is not attack. But knelling.'

World model 1, day 217.

The people who are besieging the Patriarch Bai also hear the words from the old monk. They are unhappy but they do not have any power to attack him. The head of them shouts. 'Come on! No matter what is it, kill him first!'

World model 1, day 218.

'It is too late. You fool!' Patriarch Bai bursts into laugh. He stands up and bows to the old monk. 'Sorry for the late saluting, master. I think you know what I did right now. But I was pushed for that. Please come into the area below the bowl.'

World model 1, day 219.

The head of attacker looks the old monk again. He does not hear the previous words between the old and middle-aged monk because they talked in secret. He tested the power of them and he found the middle aged monk is a senior and the old monk is a junior.

World model 1, day 220.

But now he knows he is wrong as Patriarch Bai bows to the old monk. The old monk must be an important person. He comes by and asks. 'Can I have your name, dear monk?' Patriarch Bai laugh even louder. 'You did not know who he is?'

World model 1, day 221.

'It is too late.' The old monk says. Xiaotian Cheng steps backward and gets scared. 'I'm not on purpose. I didn't know it is you so I come late for the bow. I'm so sorry for that. Please forgive me once, only once!'

World model 1, day 222.

'It is too late.' The old monk says. Xiaotian Cheng steps backward and gets scared. 'I'm not on purpose. I didn't know it is you so I come late for the bow. I'm so sorry for that. Please forgive me once, only once!'

World model 1, day 223.

The old monk says, 'You misunderstand my meaning. You are cheated by Patriarch Bai.' Xiaotian Cheng does not understand and asked carefully. 'So you are not angry for that?' 'No, not at all.' The old monk Jingxin says, 'I'm a monk, I should not be angry.'

World model 1, day 224.

'But you lose your precious time on this useless talk. You had a chance to kill him. But now I think you lost the last chance.' The old monk says and he goes into the area which is under the bowl together with his student.

World model 1, day 225.

Tianxiao Cheng knows he cannot kill Patriarch Bai today as the old monk has gone there. But he spends all his money to employ a strong team from Fun sect. He cannot accept such a result. He takes a look at the old monk and he finds the old monk does not say anything but just sitting there.

World model 1, day 226.

Tianxiao Cheng thinks for a while and he shouts. 'Kill him! At once!' One of the killers from Fun sect says, 'Are you kidding? The elder of sect Buddha-Evolution is sitting there and you want up to attack the place?'

World model 1, day 227.

'You are crazy but we are not! If we make him angry, we will be killed. All of us! He is a magic ball cultivator. We cannot afford his attack at all! He will kill us like as easy as I kill a junior!' The other people also look at Tianxiao Cheng and do not say a word.

World model 1, day 228.

Time flies second by second. The strong golden light flows among the earth from the close place to far away hill. It looks like a big round broom sweeping the flow. At last, it hits on the craters and becomes a golden shell.

World model 1, day 229.

At that time, Silence does not know what happen but only feels the golden light flow over his body. He feels someone whispering around his ear and he cannot hear clear what is that. He tries to catch the sound but it flows by quickly.

World model 1, day 230.

'Do you hear something?' Silence asks. 'Sounds like chanting but with a taste of sadness.' Xiaozhen says, 'This is not a good sign. Chanting without mercy but with sadness, I know only one thing related to that.'

World model 1, day 231.

'That's the chanting of ghost.' Before Xiaozhen goes on, Foreseen wakes up and says with drunk eyes. Xiaozhen's face becomes pale when he hears the voice of Foreseen. 'There are only two possibilities when ghost chants.'

World model 1, day 232.

'Either great mercy or great tragic.' Xiaozhen looks at Foreseen and says, 'Now I think there is only one possibility.' Silence stares at Silence and says, 'The tragic one. I never have good news when Foreseen starts to say something.'

World model 1, day 233.

Silence casts this protection magic and carries Foreseen. 'Hurry up, we need to run. Xiaozhen, stay in my protection magic. You know my major Xiaoyao. I don't care the magic cost that much.' 'Of course I know, the worst major in the world, my sad little brother!'

World model 1, day 234.

They carry Foreseen and run towards the entrance of Family Bai. Unknown follows up with an ice face and murmurs, 'Ghost chanting. More interesting!' He stops and looks into the sweeping golden light.

World model 1, day 235.

Family Bai locates in the center of a crater and there is only one narrow entrance on the sidewall of this crater. Unknown feels the light hits on the sidewall and a tiny crying comes out of the disappearing light. He frowns his eyebrow, 'magic circle?'

World model 1, day 236.

Unknow is a strong senior cultivator and he does not feel that bad in the tiny crying. But Silence and Xiaozhen are juniors and it is not easy. They feel a tiny sound goes into their mind and crying in a very small voice. They fall into extreme headache.

World model 1, day 237.

'What the hell it is!?' Silence can hardly keep his magic protection and try his best to block the ears. Xiaozhen cannot answer because he does the same thing. Foreseen falls on the floor and he shoots, 'Stupid student! You hurt me you know?'

World model 1, day 238.

'That is such a simple magic but you are so bad!' Foreseen ridicules as usual and he does not feel anything bad, 'That is only a magic to open the seal of Family Bai, but you are so weak that you drop me on the floor! I'm your teacher, both of you!'

World model 1, day 239.

The crying decays and Silence feels a lit bit better. He hears the words from Foreseen and he knows something worse happens. Actually as long as Foreseen wakes up in the drunk by force and says something, there must be something worse.

World model 1, day 240.

The crying disappears completely and Silence feels much better. But he feels nerves as there is usually a small piece of nice time before the strong darkness comes. He wants to say something but he does not know where to start. So does Xiaozhen.

World model 1, day 241.

After a short while, another tiny sound comes from the earth. This time the sound does not make them feel bad and it sounds like something digging in the earth. 'Someone escapes in our way as well?' Xiaozhen says.

World model 1, day 242.

Before Silence replies, the sound becomes a lit bit stronger and a hand bone comes out of the earth. It waves in the air and seems wants to dig but touching nothing. The hand bones turns back to dig on the earth and a sergeant comes out of the earth.

World model 1, day 243.

'Problem comes.' Silence looks at the sergeant and the sergeant looks at Silence with its black fires as its eyes. The sergeant screams and the hand bone hits on the earth. The earth shines a black light and the earth becomes a stone sword in its hand.

World model 1, day 244.

'Stone curse.' Xiaozhen says, 'The lowest magic spell of earth magic.' Silence does not say anything and cast a firesnake at once. The fire snake rushes to the sergeant and the sergeant screams with its sword hitting on the firesnake.

(A missing day here.)

World model 1, day 245.

A dark shell occurs around the sword and it resists the attack of firesnake. But the shell burns out quickly and the sergeant starts to tremble. After a second the sergeant shouts and the sword breaks into pieces. The sergeant is burnt and dies into dust.

World model 1, day 246.

But this is not the end, a dark soul comes out of the dust. It screams and rushes to Silence and Xiaozhen. Silence frowns and the protection shell shines a golden light. The dark soul dissipates in the golden light and it is finally killed.

World model 1, day 247.

'Go!' Silence shouts to Xiaozhen, he realizes the sweeping golden light and big magic circle. He does not think such a big magic power only leads to a sergeant coming out of the earth. 'It is just a weak sergeant. Don't be panic!' Foreseen says.

World model 1, day 248.

Silence picks up Foreseen on his back and does not give him a word. They start to go but it is too late. Lots of tiny sound of digging comes out from the earth. Silence cannot calm down and runs away with Xiaozhen.

World model 1, day 249.

But the situation is beyond his expectation, they run for several hundred meters but the sound does not become smaller. Silence feels a lot more pressure. 'Don't worry!' Foreseen says without a tiny panic, 'It is just a magic circle. It can revive the body in the circle to a sergeant. Very weak!

World model 1, day 250.

Silence stops. Not because of Foreseen's word but because of the sergeants coming out of the ground. They come out of the ground with a confused face. But just a second, they find Silence. Their confused face disappears. 'We are in trouble.' Xiaozhen and Silence say at the same time.

World model 1, day 251.

On the other side, the fighting among Patriarch Bai and Patriarch Cheng's team stops because of the sergeants coming out of the ground. Those attacking seniors start to come together for a stronger defense and they are struggling to go out of the sergeants.

World model 1, day 252.

But the sergeants are still keeping going out without any sign to stop. The strong magic from the seniors can easily kill lots of sergeants and the souls come after that. Screaming of ghosts, shouting of sergeants and the sound of magic explosion hit the eardrums of everyone.

World model 1, day 253.

The middle-aged monk Huiming stares at the sergeant and say, 'I guess most of area in Family Bai is like this already.' He points at the sergeants and becomes angry. 'How many bodies do you have under the family Bai?'

(A missing figure in the post.)

World model 1, day 254.

'Those are the accumulation of Family Bai during the last several hundred years.' Patriarch Bai says, 'I know what you mean, Huiming. We do not carry out massacre because if we do that there will be further problem from you. So we do not and just buy or trade body.'

World model 1, day 255.

'But your trading can kill even more, you buy the bodies and other people want to earn money from you. They start to kill!' Huiming shouts. Patriarch Bai says, 'We are sorry for that, but that is beyond our ability to stop.'

World model 1, day 256.

Patriarch Bai says and he peeps at the old monk. The old monk does not say anything but only chanting with closed eyes. They hide in the golden light of the big bowl 'Skyhiding' and the sergeants are not possible to come into it.

World model 1, day 257.

Huiming is still angry. He points at the surrounding and says, 'Such a big amount of sergeants. You want to kill all the members of your Family?' Patriarch says, 'Don't worry, when they see the golden sweeping light, they know they have a minute to go where they should.'

World model 1, day 258.

'A minute?' Huiming is angry to laugh, 'For juniors, how long they can run for a minute?! You kill most of your juniors!' 'If I don't do this, all of them will be killed by those intruders.' Huiming cannot reply a word and he sits down chanting with his teacher.

World model 1, day 259.

Those seniors on Cheng's side are in danger. Although each of them can easily kill a single sergeant, their power consumption is so huge that even the senior cannot afford for long time. Whenever their power comes to an end, they will die.

World model 1, day 260.

This is not the result they want to see. So they rush to the only possible way to escape. Family Bai is in a crater with an opening gap of a lake. If they can run over the lake before they use up their power, they will escape.

World model 1, day 261.

They move very slowly towards the lake and the Patriarch of Family Bai just stands under the bowl without any action. Until they go out of the eyesight, Patriarch Bai stands up and bows to the old monk. 'We have to move.'

World model 1, day 262.

Only several minutes, Patriarch Bai, Huiming and Jingxin stand on the edge of the lake. There are a group of seniors waiting there. Patriarch Bai says, 'Thank you for coming, brothers. Now they are trapping inside, we just need to wait and kill the lucky ones.'

World model 1, day 262.

Only several minutes, Patriarch Bai, Huiming and Jingxin stand on the edge of the lake. There are a group of seniors waiting there. Patriarch Bai says, 'Thank you for coming, brothers. Now they are trapping inside, we just need to wait and kill the lucky ones.'

(A delay post, day 262.)

World model 1, day 263.

Huiming sees the logo of those seniors on their clothes. 'Ghost-Evolution? This is how you plan? Why not stop them in advance!' Patriarch Bai says, 'Then I cannot kill them all. That will be another danger for Family Bai.' Huiming is almost crazy, 'but there are many cultivators die in your family!' 'So what?'

World model 1, day 264.

On the other side, Silence and Xiaozhen are also in danger. There are also plenty of sergeants coming towards them. Tens of bone weapons hit on the protection magic shell and Silence is trying his best to keep the shell with the help from Xiaozhen.

World model 1, day 265.

Silence does not reach his limit as his major of Xiaoyao. He can recover the magic power from his breath but Xiaozhen cannot. 'We need to find a way, Silence.' Xiaozhen says, 'You cannot support this shell if my magic power is gone.'

World model 1, day 266.

'I know, we can try to rush to the lake.' Silence says, 'But we have to take the little girl and Foreseen.' Xiaozhen wants to say something but Silence goes on. 'Foreseen, your major is Xiaoyao as well. Contribute something to the shell!'

World model 1, day 267.

'OK, OK.' Foreseen says and cast his power into the shell. Suddenly the pressure goes down a lot and Xiaozhen sits down and takes herb pills to recover his magic power. Five minutes later, he stands up and takes the little girl from Xiu Ye. 'Go!'

World model 1, day 268.

With the magic power from Foreseen, the shell is much stronger and does not blink under the intensive attack of sergeants. 'Thank you, Foreseen.' Silence says, 'This is the first time in my life that I feel so lucky to have you as my teacher.'

World model 1, day 269.

Behind them, Unknown follows them with a soft blue shell. He goes among the sergeants elegantly, just like this is a walk after dinner in his own garden. He catches the words from Silence and smiles, 'Too young too naive, young man. You will learn.'

World model 1, day 270.

Unknown looks at the gourd of Foreseen and smiles. Foreseen looks back and murmurs, 'you know me a lot.' Silence and Xiaozhen feel strange as they do not see anything when they try to look back. It is too far away and they don't have the ability.

World model 1, day 271.

Silence and Xiaozhen don't know what happens. They keep going as fast as they can. They don't notice that Foreseen has opened his gourd and starts to drink. When Silence notices the shell is not stable and he realizes Foreseen is drinking, that is too late.

World model 1, day 272.

The shell becomes thinner at once and Silence tries his best to keep the shell. But there are so many sergeants attacking, the shell breaks down in one second. Silence shouts, 'Run, Xiaozhen!' He takes the drunk Foreseen and Xiaozhen takes the little girl.

World model 1, day 273.

Silence rushes in front and use his firesnake to break a way for them, while Xiaozhen use his magic tool to defend the attack from back side. Tens of sergeants come towards them and the firesnake explores with fragments of bones.

World model 1, day 274.

The dark souls come out of the sergeants and scream around them. They need a protection shell to defend but no one has the extra power. Silence has to rush with all those dark souls attacking their bodies.

World model 1, day 275.

These dark souls have sharp paws and tear the skin of Silence. There is no scar but only dark burning stripes after the tearing. But they know how painful it is, it is like a awl is pinning to your soul. And as usual, Foreseen is lucky.

World model 1, day 276.

When the souls come to Foreseen, they become reluctant to attack him because of the heavily special alcoholic taste. Silence is inspired and he hit on the stomach of Foreseen. Foreseen throws up and all those dirty liquid drops on Silence's body.

World model 1, day 277.

Silence does the same thing to Xiaozhen and those dark souls are flying around them but cannot attack any more. They circle for a while and fly away. Silence looks at the direction they go away. That is the direction of those seniors go. 'Good luck.'

World model 1, day 278.

Unknown, the man who follows them far away, bursts into laugh. 'An interesting little brother.' He waves his hand to the sergeants attacking him, a piece of light blue frog flies out of his hand and those sergeants are in pieces. The dark souls come out and they vanish in the frog at once.

World model 1, day 279.

Unknown is walking elegantly far away after Silence, like walking after dinner in his garden. But Silence together with his friends is not in good conditions. They are trying their best to fight with those endless sergeants.

World model 1, day 280.

Those dark souls from the dead sergeants go away and they form a dark cloud in the horizon. After quite some time, there is a big explosion in the dark cloud with resentful shout. Those are the seniors who can't afford the burden of dark souls.

World model 1, day 281.

The shout keeps for a short while and it disappears. The big dark cloud loses their target and searches for new one. Part of them flies back and circles around Silence and Xiaozhen. It looks like they are on the way of decision.

World model 1, day 282.

'Silence! We must come up with new ideas. They can kill those seniors in such a short time! It looks like they are much stronger when they come together.' Xiaozhen says. 'I know. But it seems that we are not able to do something else.' Silence answers with his magic snake going.

World model 1, day 283.

But suddenly, that circling dark cloud flies towards the direction where Silence comes. 'Run!' Silence shouts, he knows that there is some other unlucky guy, 'this is our only chance to escape!' They speed up a lot and run towards the lake.

World model 1, day 284.

Unknown is a bit sad and he sees the cloud is coming to him. He sighs and takes out a talisman. The talisman is shining and a sleeping fire dragon flies on the cover. A little shining light flows from Unknown's finger to the talisman.

World model 1, day 285.

The dragon starts to wake up and opens his firing eyes. It flows on the surface of talisman and opens the mouse to shout. A crisp and loud sound bursts out. The dark cloud trembles and slows down on the way.

World model 1, day 286.

But the dragon comes out of the talisman and burns out the rest of material. It grows up quickly and comes into a real fire dragon. It shouts and flies to the dark cloud with a big explosion. The dark cloud disappears. 'Luckily I take something with me.' Unknown says.

World model 1, day 287.

Silence and Xiaozhen stun for a while and look back to the big fire dragon. 'What's that?' Xiaozhen says, 'there is a strong cultivate there!' Silence drags his hand and shouts, 'It does not matter! We have to run, don't waste the time!'

World model 1, day 288.

They run as fast as they can with Foreseen and the little girl. The lake is visible on the horizon. But unfortunately, they also see the big gold beam of light there – that is the light from Patriarch's magic tool. Silence and Xiaozhen both realize it. But they have no way.

World model 1, day 289.

'Damn it!' Xiaozhen shouts when he sees the big explosion over the lake, 'That must be the trap of Family Bai. They sacrifice so much junior cultivators but Patriarch wants to kill the Family Cheng!' 'Calm down.' Silence says, 'we may have a chance to escape.' He grasps Foreseen firmly.

World model 1, day 290.

Over the lake, the group of seniors with Patriarch Bai is fighting with the escaping seniors. Strong magic spell flies back and forth. The earth is shaking and the water is boiling. In the center of the lake, there is a big bowl flying with a beam of golden light.

World model 1, day 291.

The two monks are sitting in the golden light. No matter how strong the spells are, the water in the range of light stays calm like a mirror. But the owner of the bowl is fighting with all his power and his cloth are spotted blood. Those two monks do not look at the fighting but at the bowl.

(An early post.)

World model 1, day 292.

The old monk looks at the bowl and falls into memories. 'Do you know the origin of this bowl?' He says to his student Huiming. 'No.' Huiming shakes his head. 'Do you know the origin of our sects?' 'Yes.' Huiming starts to say and the old monk falls deeper to his memory.

World model 1, day 293.

Many years ago, a leading cultivator named Evolved Daoist built a sect of Dao-Evolution. This sect was so strong and it occupies the best place where cultivator could practice fast. Until one year, Dao-Evolution had some big problems and most of top cultivators dead in a short time.

World model 1, day 294.

The only remaining several top cultivators worried about their place. It was too good and they did not have any power to protect it. They made a decision of evacuation. All the cultivators left the great place and they moved to the edge of this mainland.

World model 1, day 295.

During the moving, they had to go across a big forest which lots of strong monsters were there. The top cultivators were so strong and they protected the cultivators in the sect to the destination. But their power is to the end.

World model 1, day 295.

During the moving, they had to go across a big forest which lots of strong monsters were there. The top cultivators were so strong and they protected the cultivators in the sect to the destination. But their power is to the end.

(An overlap post.)

World model 1, day 296.

Until they reached the edge of continent, they started to realize the information in their mind was a bit different than the actual situation. Here was not a peaceful place but was occupied by a big monster.

World model 1, day 297.

They had to fight. And they killed it. However, they were injured so much and passed away quickly. Their students started to fight for the leader position and they could not get an agreement. So they split the sect into four: Ghost-Evolution, Buddha-Evolution, Poison-Evolution and the major Dao-Evolution.

World model 1, day 298.

Those four sects killed the rest of monsters years after years. Finally the normal people can live without the threat of monsters. After that, fun sect was built independently and those are the five sects in this country.

World model 1, day 299.

This bowl was the magic tool of a monk in Dao-Evolution. He was injured so badly and dead on the way to this place. The bowl was inherited by his student and student. When the sect split into four, this bowl belonged to the Buddha-Evolution.

World model 1, day 300.

'So this magic tool belongs to our sect? Why Family Bai takes it?' Huiming asks his teacher. The old monk, Jingxin says, 'This bowl is a magic treasure rather than a magic tool.' 'Treasure?' Huiming is surprised. 'That is the tool only can be used by very senior cultivator above magic ball level?'

World model 1, day 301.

'Yes, that is it.' Jingxin says. 'Sir, you don't have a magic treasure, why don't you take this it back?' Huiming says. 'Then you need to know the difference between a magic tool and the magic treasure.' Jingxin says, 'No matter how good a tool it is, it is a tool. But a magic treasure has its life.'

World model 1, day 302.

'If a cultivator wants to use a magic tool, he has to talk to the magic treasure. The treasure has its own character. Only when the character of cultivator and the character of magic treasure fit, the treasure is powerful like a treasure. Otherwise the cultivator gets injured because the treasure does not want him as the owner.'

World model 1, day 303.

'This treasure killed too much on the way many years ago. It does not fit to my character any more. That is the reason why a senior cultivator like him can make use of it partially.' Jingxin points at Patriarch of Family Bai and says. 'It contains killing and mercy. No one can use it smoothly anymore.'

World model 1, day 304.

Patriarch Bai feels a bit strange and he says to the old monk. 'Dear sir, the Buddha-Evolution and Ghost-Evolution have agreed on this treasure.' Patriarch Bai reminds the old monk and he feels a bit danger as the old monk wants to do something here.

World model 1, day 305.

The old monk stands up and smiles to him. 'Of course I don't forget that.' Jingxin says, 'But you, the Family Bai, killed too much. I can't forgive you.' He suddenly points his thumb to the Patriarch and a golden rune comes out his finger.

World model 1, day 306.

The rune flies like a paper cut and does not hurt anything on its way. Patriarch Bai is scared and shouts at the old monk. 'You can't do that! I'm under the protection of Ghost-Evolution! There are two magic ball cultivators there. They will revenge for that!'

World model 1, day 307.

The old monk does not reply anything to his screaming and the rune flies directly to the Patriarch Bai. Patriarch Bai cast a magic towards the big bowl in the sky and a protection shell goes down around him. The rune only slows a bit when getting across the shell.

World model 1, day 308.

Patriarch Bai's face turn to be pale and he wants to do something more. But it is too late. The rune hits on his chest and he is burned to dust immediately. 'I will give a reason to Ghost-Evolution. You don't need to worry about it.' Jingxin whispers to the dust of Patriarch Bai.

World model 1, day 309.

The killing of those seniors is finished and the group of Family Bai wins. They get together and look at the old monk and the leader of them says. 'We are not part of the killing but only hired by him.' Jingxin does not look at them at all and takes down the big bowl.

World model 1, day 310.

Huiming looks at his teacher. He knows his teacher has the ability to prevent it from the beginning, but actually not. Because the old monk wants to make his heart dirty and with that evil thought the old monk can fit to the magic treasure. Then he can use the treasure to do something important.

World model 1, day 311.

The Buddha-Evolution only has one magic ball cultivator who takes the major responsibility of the sect. That's his teacher, the old monk Jingxin. But he knows, Jingxin is too old and he can't live that longer. He is the best student in the sect but he is still far away from the level of magic ball.

World model 1, day 312.

The old monk has to find a way to help him, otherwise the sect will be in danger as there is no strong cultivator who can support the whole sect. The price is too high and the old monk gives up his mercy. Huiming feels sadness but he can't say anything.

World model 1, day 313.

On the other side, Silence and Xiaozhen is in great danger. They try their best to run and protect but the endless attack from sergeants finally trapped them again. Series wounds are on their body and they keep bleeding. They don't have time to settle that and they are going to die.

World model 1, day 314.

The protect shell is to the limit and there are lots of cracks on it. At the edge of breaking, a strong power goes into the shell. The power is so strong and the shell becomes stable in the fierce attack of enemies.

World model 1, day 315.

A man in black occurs in the shell and look at them. It is a bit embarrassed. Silence recognizes he is the man behind them. They just make a lot of evil spirits to him. The man in black does not say anything but keep going.

World model 1, day 316.

Silence and Xiaozhen looks at each other, they don't know who is the man but they have to go with him, together with the little girl and Foreseen. Silence says to the man, 'Thank you. Please let us know who you are. We will pay you back.'

World model 1, day 317.

The man does not reply and keeps going. Silence asks again. But he still does not reply. Silence looks at Xiaozhen and Xiaozhen nods to him. They fight so much just for a freedom. If they follow the man and go out of this place, the man can trap Silence again.

World model 1, day 318.

They can feel the man is even stronger than the Patriarch Bai. If they are caught by this man, they will never escape. Silence and Xiaozhen stop. Silence says, 'We are so thankful that you save us. We can pay you in the future. But, please let us know what is your purpose.'

World model 1, day 319.

The man looks at him for a glance. Silence feels like the man catches all the secrets from him. He thought the man is angry and wants to kill him. But fortunately the man says, 'I'm Unknown. Hired by Foreseen.'

World model 1, day 320.

'Hired by Foreseen?' Silence is a bit surprised. He knows how poor is Foreseen and Foreseen never leaves him. How does Foreseen hire such a strong cultivator? Before he phrases his question, Xiaozhen shouts out, 'Unknown, you are Unknown from Fun sect?'

World model 1, day 321.

'You know him?' Silence says. 'Of course, he is labeled as the strongest cultivator in Fun sect!' Xiaozhen says, 'Our elder once says, as long as he is in the Fun sect, no one can beat us! All the elders in Fun sect do not comment on his sentence!'

World model 1, day 322.

Unknown steps towards the lake, just like he does not hear anything. Silence and Xiaozhen carry the little girl and Foreseen to catch up his pace. Silence shakes Foreseen when he is walking. 'Hey! Wake up. When do you do this, my dear teacher? If you have the money to do this, pay me your drink fees!'

World model 1, day 323.

Foreseen gradually wakes up and rubs his eyes. 'Time to eat?' Silence heals the wounds and shouts, 'Nothing to drink, old man! You have the money to hire such a strong cultivator. You are rich! Why not pay the drink yourself!'

World model 1, day 324.

'I don't pay anything. That's what he wants to do. Isn't it, my student?' Foreseen says to Unknown. The old man does not look back and says. 'You does not pay me. But remember, this is the last thing I will do for you!'

World model 1, day 325.

'Student?' Xiaozhen and Silence is surprised so much, 'You are the student of Foreseen as well?' Unknown does not say anything. But Silence and Xiaozhen know it is true. 'Oh, my god. The best cultivator in Fun sect is my big brother!' Xiaozhen whispers.

World model 1, day 326.

Jingxin keeps silence for quite a while. He looks towards the direction of Unknown and whispers. 'He does not accept any task for a long time. Why does he come to help juniors here?' Jingxin cannot understand.

World model 1, day 327.

Jingxin doesn't wait for Unknown. He knows Unknown will bring something he is not sure to control. Jingxin points at the big bowl in the sky. The bowl trembling a bit and golden light comes out of it. People around him seem to hear a shape sound coming out of the bowl, like bird singing.

World model 1, day 328.

That sound only keeps a short while and a coarse beam of light drops down to the lake. Meanwhile, all the sergeants in Family Bai stop attacking and keep silence for a while. They left their enemies and turn to the lake direction. Next second, they run to the lake.

World model 1, day 329.

The sergeants run in such a hurry. Some of them break the legs on the way. But they still keep running with a single leg. All the souls in the sky also give up the enemies and fly to the lake. Thousands of sergeants and souls come together. They ruin all the creatures and houses on the way.

World model 1, day 330.

Those sergeants and souls hit on the beam of light on the lake. The sergeants come to dust and the souls come to smoke. But they keep going crazily. All the power and resentment are absorbed by the bowl in the sky. The golden light gradually becomes dark.

World model 1, day 331.

On the other side, Unknown tastes the danger when he hears the sound from the bowl. He drags Silence and Xiaozhen at once and flies quickly to the lake. Silence and Xiaozhen do not know what happens. But next second, they are scared by the crazy sergeants and souls.

World model 1, day 332.

Unknown just watches and doesn't do anything. The sergeants and souls are removed within several hours. Family Bai is ruined completely and Jingxin says, 'Long time to see you, Unknown.' 'The same.' Unknown replies.

World model 1, day 333.

'I thought you are coming for this bowl, but luckily not.' Jingxin says, 'People say you are the best cultivator in Fun sect. I don't confidence to win against you. I'm prepared but you are not coming for this. It is a bit pity.'

World model 1, day 334.

'You are a monk.' Unknown says. 'I know. I should not have such feeling because I'm a monk. Those feelings will make me weak and it is backward.' The monk says, 'but anyway, I'm a cultivator and I can't live that longer. I'm thinking for a long time how strong you are. Could you give me an answer?'

World model 1, day 335.

Unknown steps forward. He knows there is not another option. 'Thank you.' Jingxin says, 'I practice my fingers in my life. And I only practice this.' The old monk looks at his hand and says. 'The feeler finger I use, the stronger attack it will be. Be careful.'

World model 1, day 336.

Unknown does not say anything. And the monk extends his palm and catches the air. Suddenly a big hand forms in front of Unknown and the big hand encloses Unknown. Several talismans explore

around Unknown and a dark shell withstands the big hand. After several seconds, they both disappear.

World model 1, day 337.

'Only a senior?' The old monk Jingxin is confusing, 'You are only a senior. How can you win against the elder in Fun sect?' The old monk puts out his hand and golden light is around his five fingers. The light suddenly disappears on four fingers and concentration on one.

World model 1, day 338.

The old monk says, 'Let's see whether you are really only a senior!' He points out his finger towards Unknown. A sharp beam flies over quickly and Unknown is series. He shouts out and a soft wave goes out of his body. The attack penetrates into it but refracts to another direction.

World model 1, day 339.

A senior in the surrounding gets this attack. His protects is broken like a thin paper against this attack and he dies. 'The devil mirror of wave!' Jingxin whispers, 'That's the answer. But you are on purpose to kill that guy. Why?'

World model 1, day 340.

'They will be the enemies.' Unknown says. 'Smart guy.' Jingxin says with a smile, and he points at Foreseen and says to the rest of seniors around, 'The ghost fire is there.' He points at Foreseen and a green bowl is shining in the pocket.

World model 1, day 341.

Unknown is a bit surprised. All the seniors look at Foreseen like a piece of meat. The old monk and his students go away. 'They are smart.' Foreseen says, 'They don't want to fight and they don't want to let us go. Now even I give the ghost fire to them. They will kill us to keep the position of it as a secret.'

World model 1, day 342.

'Not a big surprise. Whenever I accept the task from Foreseen, I start to know all the cultivators alive will be the enemies at last.' Unknown says. Silence says, 'Indeed, like when Foreseen starts to drink, I know I have to pay no matter what I do.'

World mode 1, day 343.

'Can you let us go if I give the ghost fire to you?' Silence wants to have a try. But all those tens of seniors do not reply a word. They only think about how to get it and kill the rest of people to keep the information.

World model 1, day 344.

Those tens of seniors are waiting. They are not sure whether the old monk will be back or not. Silence and Unknown are trapped by them. They don't want to fight as the number of enemies is too much.

World model 1, day 345.

The head of those seniors look at a black ball in his hand. After a couple of hours, the black ball shines and a slight sound comes out of it. The monks are left. They went away with the far-distance magic circle.

World model 1, day 346.

'Break the circle!' The head of seniors says put down the black ball. He looks at the Foreseen and Unknown. The seniors besides him say, 'Do we really fight with them? That's Unknown, the best in our sect!'

World model 1, day 347.

'I know.' The head says, 'if he is a magic ball cultivator like Jingxin. I will never think about it. But he is a senior only. We have seen that.' 'But he survives from Jingxin's attack!' The senior says. 'Possibly he uses some extreme way. Like the one I have which can be used only once.'

World model 1, day 348.

The head has made up his mind. And he starts the attack. Other seniors have to attack together otherwise Unknown will come back to Fun sect and tells to the elders what they do today. They will not survive from that.

World model 1, day 349.

Unknown is not as strong as they think. The seniors start to attack but not with all their power. They just want to test the power of Unknown. If Unknown is too strong beyond what they can afford, they will just run away and do not go back from Fun sect forever.

World model 1, day 350.

But Unknown is not as strong as they think, he just stands beside the lake together with Silence and rest of people. A slight blue shell covers all of them and defends the attack. Unknown even does not fight back.

World model 1, day 351.

The head is happy and shouts, 'Unknown must get injured under the attack of Jingxin. Fight with full power and kill him!' Those seniors hesitate a bit but start to enhance the power. Lots of strong spells come together with fire and thunder.

World model 1, day 352.

Unknown does not change his ice face and does not say anything. He just stands there and watches those seniors, like watching a list of bodies. Those strong spells reach the blue shell. The shell becomes soft and absorbs the attack.

World model 1, day 353.

Those attacks come out of the shell and go back to those seniors. But those seniors change to protect and it does not kill any of them. The head is shocked and shouts, 'Wave Mirror? That's the Wave Mirror?! That is your major?!'

World model 1, day 354.

Unknown does not reply but just stands there. Wave Mirror is the best major when fighting with many people. It can absorb the attack and send it back to the enemies. As long as his magic power does not use up, the mirror will not break.

World model 1, day 355.

With the time goes by, the head becomes nervous and he knows if he does not use the final way, they will get killed by Unknown. At the same time, Unknown says to Silence, 'Be careful, something bad will happen as Foreseen is here.'

World model 1, day 356.

Silence knows it a lot from his bad memories. No matter how hard he tried, he had to pay for the drink of Foreseen, he had to pay for the stolen things by Foreseen, he had to pay for everything broken by Foreseen. 'Foreseen is here' is the worst case he can reach.

World model 1, day 357.

The head takes out a golden bowl. The shape of that bowl looks pretty similar to the 'ghost fire'. The head pull all his power into this bowl and the bowl is filling with liquid. At the same time, the 'ghost fire' in Silence's pocket starts to shine.

World model 1, day 358.

Unknown realizes something and shouts, 'Throw it away!' But it is too late. The liquid in the golden bowl disappear and comes into the ghost fire. The ghost patterns on the bowl come to live and go out of it at once.

World model 1, day 359.

Those ghosts fly out of the wave mirror of Unknown and break it, with the attacking power from those seniors. Unknown burns all those mirror and protect the people with his last power. Magic fires and magic water in the mirror hit with each other and evaporate.

World model 1, day 360.

At that moment, Silence tastes something different. 'The burning of water leads to... wind?' His major Xiaoyao starts to practice itself. A magic snake comes from his left hand and a water cloud comes from his right hand. They hit on each other and form something different around them.

World model 1, day 361.

'Don't move!' Unknown shouts, the magic snake and water cloud forms again and again. Xiaozhen starts to realize something dangerous is coming out of that. 'That's wind blade?!' Xiaozhen says, 'Silence does not have the ability of wind, how he can use that power?'

World model 1, day 362.

The enemies does not stop, a senior is still casting power on them. But when he starts to use power, the magic power from the surrounding starts to form lots of wind blade towards him. The more he defends the more he gets. At last, he is killed by the endless wind blade.

World model 1, day 363.

Everyone is scared and they stand there. A senior wants to run away without magic power. But when he moves, his body seems hit on a lot of blades and he dies at once. The wind blades also attack the people around that guy and kill several of seniors. Other people now just can stand there and watch each other.

World model 1, day 364.

Silence is still in that situation. He can taste how the power of fire and water become wind. The power from the nature goes into his body and change to wind. He feels so good and does not realize what happens.

World model 1, day 365.

Until Foreseen recovers from the drunk, he stretches his lazy body. He points out his finger and casts a water cloud to clean his face. Such a small magic power attack all the magic from the surrounding and the strong power gets around him.

World model 1, day 366.

Those seniors feel the power is gone and they run away. Foreseen get a big storm around him but no blade is formed and no one gets injured but only like a big shower. But those running seniors do not dare to go back. Silence stands there and does not know what happens. 'The story starts, my student.' Foreseen says.

Day 366 is the last day. This is an example of how to make a chain. I tell the truth everyday.
